QUERIES ARIZONA BEGINS NELSON ASSUMES OCTAVE THE STAGE OF

FULFILLED, AND A VAST TONNAGE IS AVAILABLE FROM GREAT DEPTH.

Arrivals from Crown King impart the important news that the Nelson Mining Company has entered the productive stage, and shipping of high chinery is arriving at the Octave grade gold ore will soon begin. This Mining Company camp, and it is beaction results from the two main levels being connected, approximately 275 feet apart. The tonnage being tendent has arrived to succeed former shot down is occasioning comment as Superintendent Anderson, and it was the culmination of a successful undertaking, from the values carried, and is production being the purpose. The noteworthy also in placing this prop-plant on the ground is of modern erty in a stage of production on a basis of permanency. The development of the property had been under way for over three years, and strikes made at frequent times in driving the two tunnels for over 2,700 feet at one point ,established an attractive proposition with the workings linked, which has been accomplished recently. What tonnage is available is not known, but it is assured, however, that the two points opened will provide an inexhaustible production for years to come, owing to the great depth reached in extending the tunnels into a zone of mineral which was determined originally in surface workings near the apex where the outcropping occurred. The Nelson, in short, has a backing of nearly 500 feet, and without taking into consideration what the extension of the two tunnels may FALSE CLAIMS BEING FEATURE OF THE FAIR afford. The mine is made, is the belief of those conversant with the situation.

DEVELOPMENT PLANS REPORTS THAT OLD GOLD PROPERTY IS NOW IN LINE TO BEGIN PRO-DUCTION AT ONCE.

(From Friday's Daily.)

Arrivals from the Congress country report that a full equipment of malieved that extensive development is under consideration. A new superinstated there is every probability of make consisting of a large Deisel engine and air compressor to drive five drills. It is also believed the product of the Octave is to be treated by the plant on the ground, and if such is the intention a huge tonnage is ready from exploration during the past three years.

Boston operators succeeded to the ownership of the property under bankruptcy proceedings nearly four years ago, and since then have been quietly getting the mine in shape for production, opening up new levels and sinking the main shaft to a depth of over 1,200 feet. Those conversant with underground conditions report an immense tonnage of high grade gold ore as having been determined during the past year.

MADE BY DEMOCRATS

(From Thursday's Daily.)

Some of the Hunt people in Southrn Arizona are claiming that Tom Campbell will not carry Yavapai county. An inquiry as to the basis for their claims brings out the fact that they have no absolute information but that they think the working men in the big camps are all going to vote for Hunt and that the "Hassayampers" in the outlying mining districts will vote for the Democratic candidate without regard to who he is.

An investigation of conditions that exist in the different parts of Yavapai county by the Republican county committee shows that these claims are absolutely unfounded.

In Jerome and Clarkdale quite a number of men have drifted in in the last 12 months who are violent Hunt partisans. They make more noise than all the rest of the camp put toand how honest he is, will not vote

for Hunt. The camp at Humboldt is made up largely of family men who have been going to vote for him because they know that he is the best kind of a friend labor can have and that what he represents will best tend to insure for them a continuance of prosperity

A close inquiry has been made in the outlying precincts. The results have been extremely interesting.

The old-timers who have seen Tom Campbell grow up from a small boy n Prescott and have learned the full caliber of the man have not failed im. The returns from these outlying precincts show that at least half of the voters registered as Democrats will east their vote for Campbell on November 7th.

Under the circumstances it would not be surprising if Campbell should have a good 1,500 votes to spare.

REOPENING OLD ROAD BENEFITS COUNTY

(From Friday's Daily.)

Arrivals yesterday from Hooper reorted the road building force under Thomas Madden as within two miles of that point. A fine grade is being established and good headway made in construction. After leaving Goodwin, on Turkey creek, a high elevation route was selected which reduces the distance to Hooper over four miles, and insures against damage by washouts. The mining field in the country adjacent to Hooper and also in the Crown King zone will be tapped by the new road and the country opened to traffic for the first time in nearly seven years. Two new mining camps are to be established as the outcome of this road movement.
